

Ispis paketa po veličini

naredba: dpkg-query/aptitude show

Kad ponestane prostora na disku zgodno je moći saznati koliko pojedini paket zauzima prostora (zbog potencijalnog brisanja). Pronašli smo skriptu koja na čak četiri načina prikazuje koji paketi zauzimaju najviše mjesta (link: <https://ubuntuforums.org/showthread.php?t=599424> [1]).

```
#!/bin/bash
if [ $# -ne 1 ]
then
    echo "usage : $0 <0/1/2/3>"
    exit 0
fi

if [ $1 -eq 0 ]
then
    aptitude show '~n.*' | awk '\
/^Package:/ {p = $0};\
/^State:/ {s = $0};\
/^Uncompressed Size:/ {print p " " s " " $0};\
' | grep 'State: installed' | sed 's/: /:/g' | sort -t: -n -k4 | more
fi

if [ $1 -eq 1 ]
then
    dpkg-query -W --showformat='${Installed-Size;10}\t${Package}\n' | sort -k1,1n
fi

if [ $1 -eq 2 ]
then
    dpkg-query --show --showformat='${Package;-50}\t${Installed-Size}\n' | sort -k 2 -n
fi

if [ $1 -eq 3 ]
then
    dpkg-query --show --showformat='${Package;-50}\t${Installed-Size} ${Status}\n' | sort -k 2 -n |grep -v deinstall
fi
```
