## License Agreement

To proceed you must accept the Oracle Software License Terms.

GNU GENERAL PUBLIC LICENSE  
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA  
Everyone is permitted to copy and distribute verbatim copies  
of this license document, but changing it is not allowed.

Preamble  
=====

The licenses for most software are designed to take away your freedom  
to share and change it. By contrast, the GNU General Public License is  
intended to guarantee your freedom to share and change free  
software--to make sure the software is free for all its users. This  
General Public License applies to most of the Free Software  
Foundation's software and to any other program whose authors commit to  
using it. (Some other Free Software Foundation software is covered by  
the GNU Library General Public License instead.) You can apply it to  
your programs, too.

When we speak of free software, we are referring to freedom, not price.  
Our General Public Licenses are designed to make sure that you have  
the freedom to distribute copies of free software (and charge for this

## Choosing a Setup Type

Please select the Setup Type that suits your use case.

- Developer Default**  
Installs all products needed for  
MySQL development purposes.
- Server only**  
Installs only the MySQL Server  
product.
- Client only**  
Installs only the MySQL Client  
products, without a server.
- Full**  
Installs all included MySQL  
products and features.
- Custom**  
Manually select the products that  
should be installed on the  
system.

### Setup Type Description

Installs only the MySQL Server. This type should  
be used where you want to deploy a MySQL  
Server, but will not be developing MySQL  
applications.

## Windows Service

Configure MySQL Server as a Windows Service

### Windows Service Details

Please specify a Windows Service name to be used for this MySQL Server instance. A unique name is required for each instance.

Windows Service Name:

Start the MySQL Server at System Startup

### Run Windows Service as ...

The MySQL Server needs to run under a given user account. Based on the security requirements of your system you need to pick one of the options below.

- Standard System Account  
Recommended for most scenarios.
- Custom User  
An existing user account can be selected for advanced scenarios.
